

Social media shouts out help!

Social media is a powerful tool for seeking assistance.

The process is simple - just select your preferred platform.

For optimal results, create a post on Facebook or Instagram about the course you're attending. Provide a brief description of the course and express your thoughts and feelings. If you have any videos from your lessons, feel free to share them. If not, you can share one of our videos from YouTube or our official Instagram page. These posts will enhance our visibility on social media platforms.

Another effective method is to leave feedback about our school on Google. This will boost the visibility of our website on the search engine.

In case you haven't already, it would also be beneficial to follow our social channels and enable notifications. For example, by subscribing to our YouTube channel, you will receive updates directly.
